

# **BLOCKCHAIN IN TURKISH PUBLIC SECTOR**

**Muhammed Emin Torunođlu**  
**Head of Department**

**Department of Behavioral Public Policy  
and Disruptive Technologies**

# Agenda

- Disruptive Technologies
- Cross Border Trade
- Pilot Project I – Sharing Test Results
- Pilot Project II CCW Export Control
- International Cooperations
- Roadmap

# Behavioral Public Policies and Disruptive Technologies Department

## Behavioral Public Policies

- Human focused – fact based policy design
- Application of behavioral theories in real life public policies
- Testing new policies in pilot groups before full scale implementation
- Cooperation with international institutions (OECD, WB, BIT, EU)

## Disruptive Technologies

- Blockchain application in existing foreign trade system
- Using artificial intelligence and machine learning as a predictive tool in trade and economy policies

## Project Implementation

- Implementation of projects conducted by the DAT team
- Financing projects by international institutions (OECD, WB, BIT, EU)
- Monitoring of project performances
- Quality control of project outputs

# What is Behavioral Public Policy?

People are «actually» not so rational when making decisions. The behavioural theory precisely develops on this point. The public sector, in that respect, can lead the citizens to «right» preferences by utilizing such theories.

- **Classical economic theory**
- **Behavioural the**
- **Nudge theory**
- **Choice architecture**

The Nobel Prize for Economics was given to Richard Thaler, author of the book "Nudge" in 2017. The same award was given to Daniel Kahneman in 2002 for his work in behavioural economics.

**Robotic  
System  
Automation**

**Internet of  
Things**

**Blockchain**

**Artificial  
Intelligence**

## **Decentralization**

**No Need for a  
Central Database**

**Issue of  
Trust**

**Consensus  
System btw pairs**

**Multiple Data  
Providers**

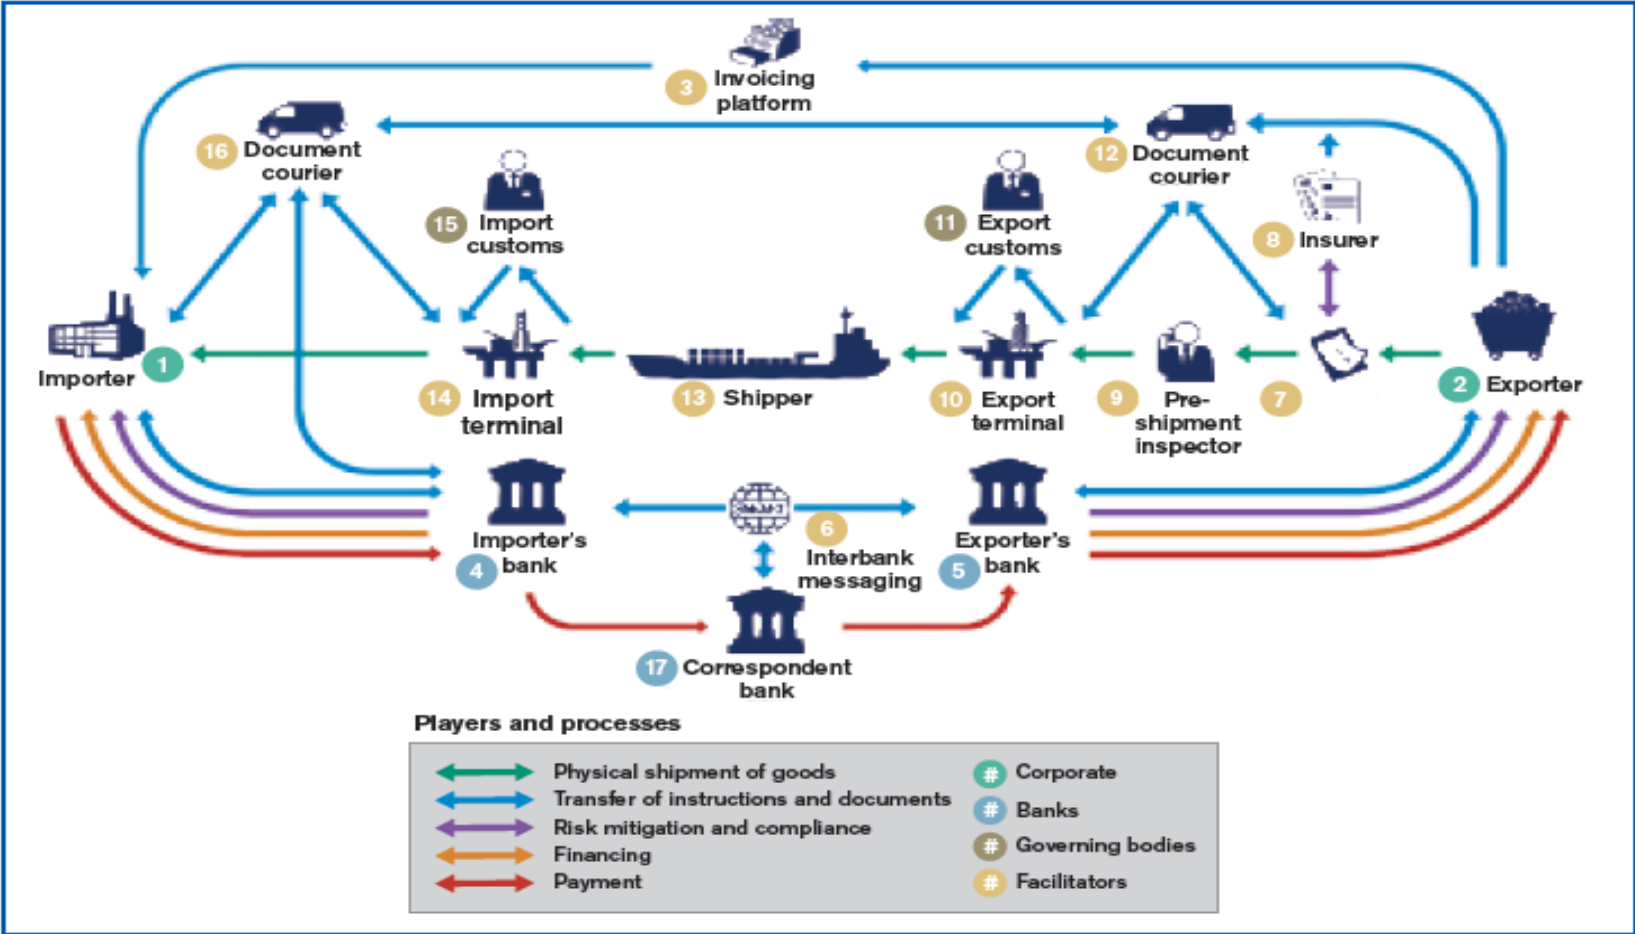

**Authority is  
Shared**

**Immutability**

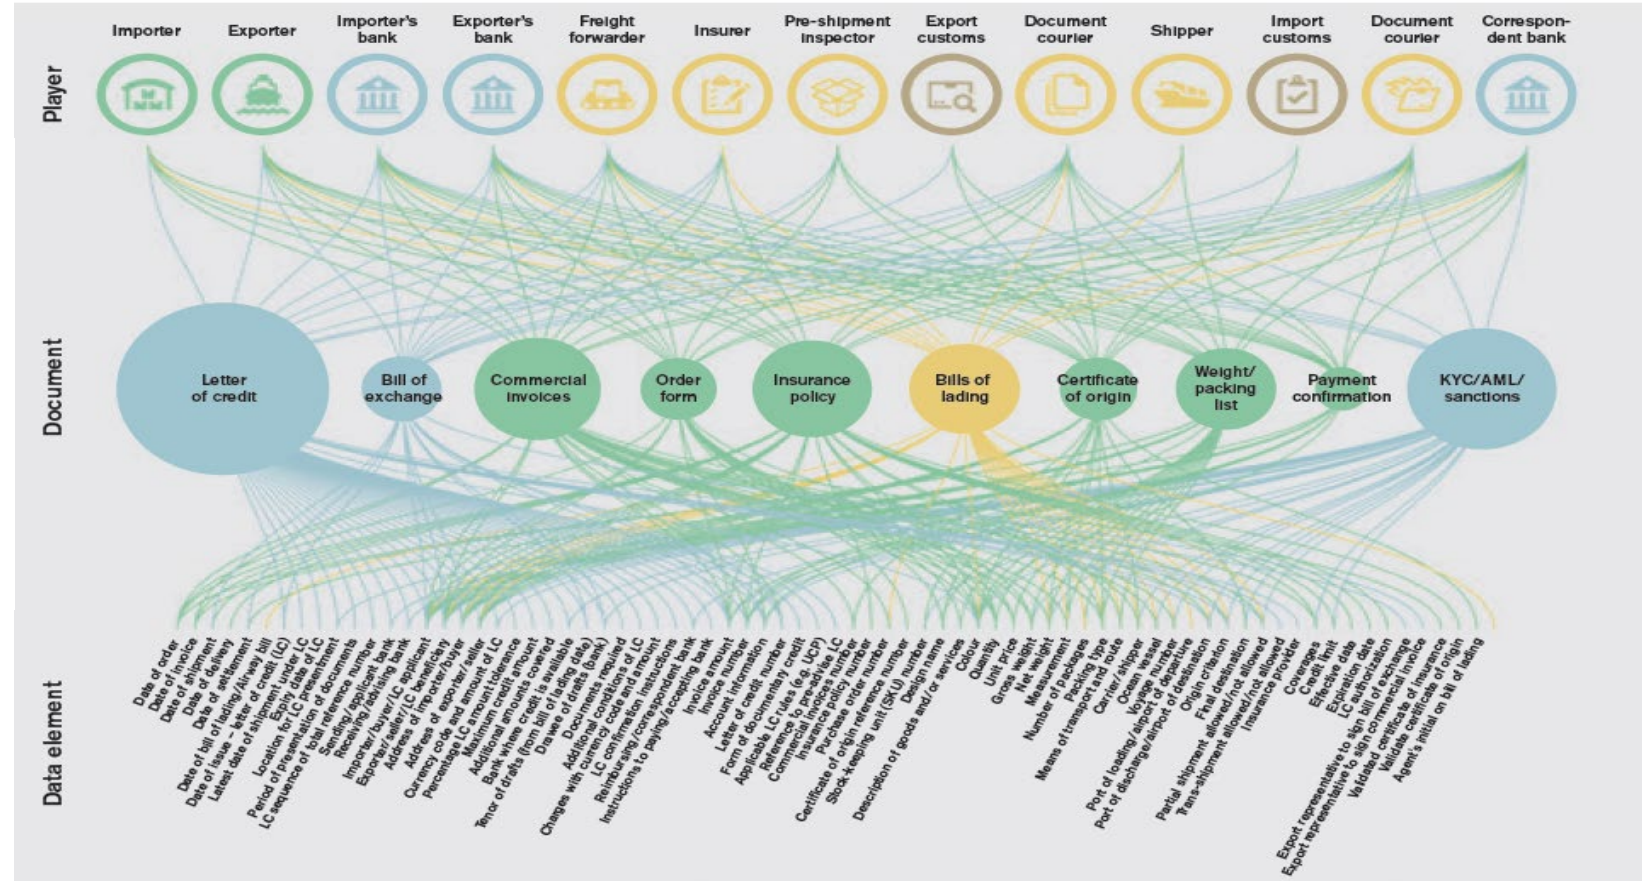

**Strong Audit**

# The promise of Blockchain resonates with the challenges of cross border trade

Source: Boston Consulting Group (2017).

# Repetitive sharing of many documents shared with many public authorities and private parties

Source: Boston Consulting Group (2017).

# VISION : BLOCKCHAIN IN FOREIGN TRADE PROCESSES

**Transferring all processes related to foreign trade to a system that works with blockchain infrastructure**

## Trade Finance

- A roundtable meeting was held on March 21, 2019 with 40 representatives of 17 banks.
- Meetings were held with the IBM team, the developer of “we.trade”.
- The payment systems were discussed with the CBRT (TCMB).
- A meeting was held with EMRA (EPDK) and CMB (SPK) and data security issues were discussed.
- Talks in progress with Singapore through Commercial Counselor
- A meeting was held with HSBC on 27 June

## Customs Procedures

- Meetings were held with Microsoft, IBM, Bosch, Swisscom Blockchain, Procivis
- A workshop of origin was held with Microsoft.
- Two workshops were held with Bosch.
- Talks progressed with Atez Software, Lean Power Solutions, T2 and Dusoft
- The bids of the firms were evaluated
- The London Chamber of Commerce was contacted.

## Logistics&Transport

- A meeting was held with IBM on Tradelens and the entry specifications were reviewed.
- An export scheme to the Netherlands has been studied with BTP.
- Meetings were held with Samsung on the Nextledger platform.
- Courses have been taken to understand customs processes.

# PILOT PROJECTS

**Pilot Project I:  
Increasing Productivity  
By Sharing The Test  
Results of Products on  
Blockchain**

**PROBLEM:**  
There are overlapping tests done by different authorities during import and export processes for the same products.

Ministry of Agriculture  
and Forestry  
↓  
product safety tests

Ministry of Trade  
DG of Product Safety and Control  
↓  
commercial quality control  
tests

Ministry of Trade  
DG of Customs  
↓  
determination of  
HS Code tests

**SOLUTION:** Applying a Blockchain solution enabling to share the test results executed by different parties, so that no any party will repeat a test that is already done by another party

Lowering Costs for  
Firms

Increasing Cooperation  
between Public Authorities

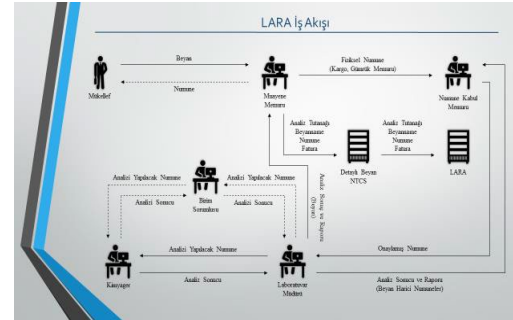

Easier process monitoring for firms  
and the government

# Pilot Project I: Increasing Productivity By Sharing The Test Results of Products on Blockchain

Established a working group

Completed the process mapping

Organized field visits

Organised a workshop in cooperation with the

Integrated the Project into Presidency Action Plans

## Pilot Project II: CCW (Convention of Chemical Weapons) KSS Export Certificate

- Turkey is a party to The Wassenaar Arrangement On Export Controls For Conventional Arms
- This document is chosen because of:
  - i. Its clear-cut process within one Directorate (DoE)(IHR)
  - ii. Being an electronic document in TPS
  - iii. Subject to control of sensitive materials

### **What we have done so far:**

- A project team was formed together with the General Directorate of Exports, IT Department, a bank and a technology company.
- A project calendar was created by identifying the phases and sub-processes of the project.
- A comprehensive legislative analysis and system architecture have been drawn up to date.
- The installation of the servers required for blockchain technology in our Ministry has been completed.
- The analysis phase of the network architecture is currently in progress.
- After the analysis phase, the chaincode software process will start.

# Government Blockchain Conference, Enrollment of The Ministry to BC Turkey Platform

To raise awareness on the benefits of using Blockchain in the public sector.

**Memorandum of  
Understanding signed with  
BlockChain Turkey Platform**

**400 people from 60  
different institutions**

# INTERNATIONAL COOPERATIONS

## Singapore

A working group was established working on a joint project for using blockchain in bilateral trade.

## European Blockchain Partnership

- Europe based, a European Commission supported association
- Businesses, countries and international organizations are members
- We signed an invitation letter to join in.
- We are invited to the convention in Malaga in November,19

Can Blockchain revolutionize international trade?

## Collaboration on Digital Economy

## Singapore

- Ministers started a cooperation on April 2019
- A working group was established to identify the priority areas to foster bilateral trade

### **Digitising paper based documents**

Sub working groups are working on e-certificate of origin and SPS documents

### **Exploring the use of Blockchain through a pilot project**

Cooperation on InfoComm Media Development (IMDA)s e-lading Blockchain project

**Necessity for Strong Cooperation among different institutions particularly in cross border trade**

**Minimum change in existing procedures and legislation to move fast**

# Challenges

**Global use cases a mostly PoCs and pilots which arises questions on interoperability and scalability**

**New and Developing Technology which requires resources for capacity building of inhouse IT teams**

## **Next Steps**

**Singapore: Pilot Project (PoC) will be completed**

**USA : A Project will be conducted within the Digital Dialogue**

**KSS Export: Phase 1 will be concluded. IT Dept. Of Ministry capable of coding blockchain**

**KSS Import: Phase 2 will start.**

**Olive Oil Test Certificates: First Project in Public Sector will be concluded.**

**TPS: Other documents in TPS will be evaluated for a pilot Project.**

REPUBLIC OF TURKEY  
MINISTRY OF TRADE

# THANK YOU

Behavioral Public Policies and  
Disruptive Technologies Department
